TRANSMISSION FLUID

PENTOSIN FFL RACING

Double Clutch Transmission Fluid for Nissan GT-R

DESCRIPTION

Pentosin FFL Racing is a special fully synthetic transmission fluid which has been developed for the application in the new Nissan GT-R R35 double clutch transmission (DCT). This transmission is a highly sophisticated, complex high-tech aggregate which puts extremely demanding requirements onto the transmission fluid. To avoid noisy stick slip effects (shudder) of the clutches when starting and at high temperatures, Pentosin FFL Racing's friction characteristics have been adjusted accordingly. All crucial DCTF performance criteria as e.g. cold flow performance, shear stability, evaporation loss and wear stability have been lifted to highest possible levels.
